## Assessment Tracker Freebie

The assessment mat and tracker can be used for any subject and/or word list. Each student will need an assessment tracker. When assessing a student one-on-one, present the assessment mat. The student will track across the mat left to right and state the answers aloud. The teacher will track each answer stated correctly on the left side of the tracker. Use a different colored pen for each assessment period. The teacher will graph the overall total for each assessment period.

This assessment and tracker is available in an EDITABLE format. You can change the words, sentences, and/or content matter and edit it for your needs. The editable format is in PowerPoint. Please be sure to follow these detailed steps to EDIT the tracker and assessment mat. Click HERE to access the editable format. Once you click, a Google Doc will open. You can NOT edit the Google Doc to your needs. You will need to DOWNLOAD the tracker to edit it. After you click the link above, click the white download arrow in the upper right hand corner. This document is already "shared" so it does NOT require permission to download or edit it. If you are presented with a message about permission please review the instructions I've listed here. Once you have downloaded the editable version it will open in PowerPoint. You will need to be on a desktop or laptop computer to edit the document. The document does include two free fonts. You can download those fonts HERE and HERE.

If you have download issues or editing issues please reach out to my via email at littlemindsatworkLLC@gmail.com
